

SDL

MUNICIPAL
MANAGEMENT
SOFTWARE

SPATIAL DATA LOGIC

Construction

Access information and take action on-the-go

Why SDL

At Spatial Data Logic (SDL), we understand that quick access to accurate records is vital to effectively run your department. For over 20 years, our municipal management software has helped improve visibility across departments and streamline workflow for staff.

SDL's Construction Module is designed to help complete inspections, issue permits, address issues and manage resources with ease whether you are in the field or at your desk.

How We Help

STREAMLINE TASKS

Process and link all applications, permits, certificates, inspections and violations

FIELD ACCESSIBILITY

Access records, view maps, reference codes, complete reports and submit pictures while onsite

RESOURCE MANAGEMENT

Help staff manage requests, schedule personnel, track resources and meet deadlines

COLLABORATION

SDL modules work together to provide a comprehensive view of property history allowing staff to access information and collaborate across departments

GIS MAPPING

Town map linked to property information and documents. Overlay visual layers such as flood zones, waterways, terrain, land value and building type

Innovative
partnership
with ICC

1 Million +
inspections
completed via
SDL Mobile

SDL Portal is a
time saver. "...75%
decrease in foot
traffic & calls"
