

SDL

MUNICIPAL
MANAGEMENT
SOFTWARE

SPATIAL DATA LOGIC

Police

Access pertinent town information

Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Police Module is designed to help staff register security alarms, track pets and access property information.

How We Help

ON-THE-GO ACCESS

Access owner, tenant and property information from patrol cars prior to arrival using SDL Portal

ALARMS/SECURITY SYSTEMS

Register alarms and security systems. Track owner contact information and false alarms

PET INFORMATION

Search to see if there is a registered pet on the premise prior to arrival. Access your town's pet license database to reunite lost pets with their owners

COMPLETE RECORDS

SDL modules work together to provide a comprehensive view of property history by department

GIS MAPS

Town map linked to property information and documents such as permits, complaints and violations
