

SDL

MUNICIPAL
MANAGEMENT
SOFTWARE

SPATIAL DATA LOGIC

Managers

Connected Government. Connected Citizens.

Why SDL

Spatial Data Logic's Municipal Management Software helps bridge the gap between municipalities and their constituents by providing visibility across departments, streamlining workflow for staff and enabling self-service access for residents.

Our Manager Module is designed to help managers and administrators keep a pulse on the department activity, concerns and requests throughout their municipality.

How We Help

REPORTING

Get a quick view of the activities and concerns municipal-wide. Summary reports help uncover trends such as areas of growth or reoccurring issues

COMPLETE RECORDS

SDL modules work together to provide a comprehensive view of property history allowing staff to access information and collaborate across departments

RESOURCE MANAGEMENT

Track man-power, equipment and materials

SET ALERTS

Receive notifications for applications, complaints and approaching deadlines

MUNICIPAL & RESIDENT SOLUTION

Both residents and municipal staff benefit from SDL's platforms. Municipal staff can streamline and automate tasks while citizens can submit requests, search for information and track progress online
