SDL MUNICIPAL MANAGEMENT SOFTWARE
SPATIAL DATA LOGIC
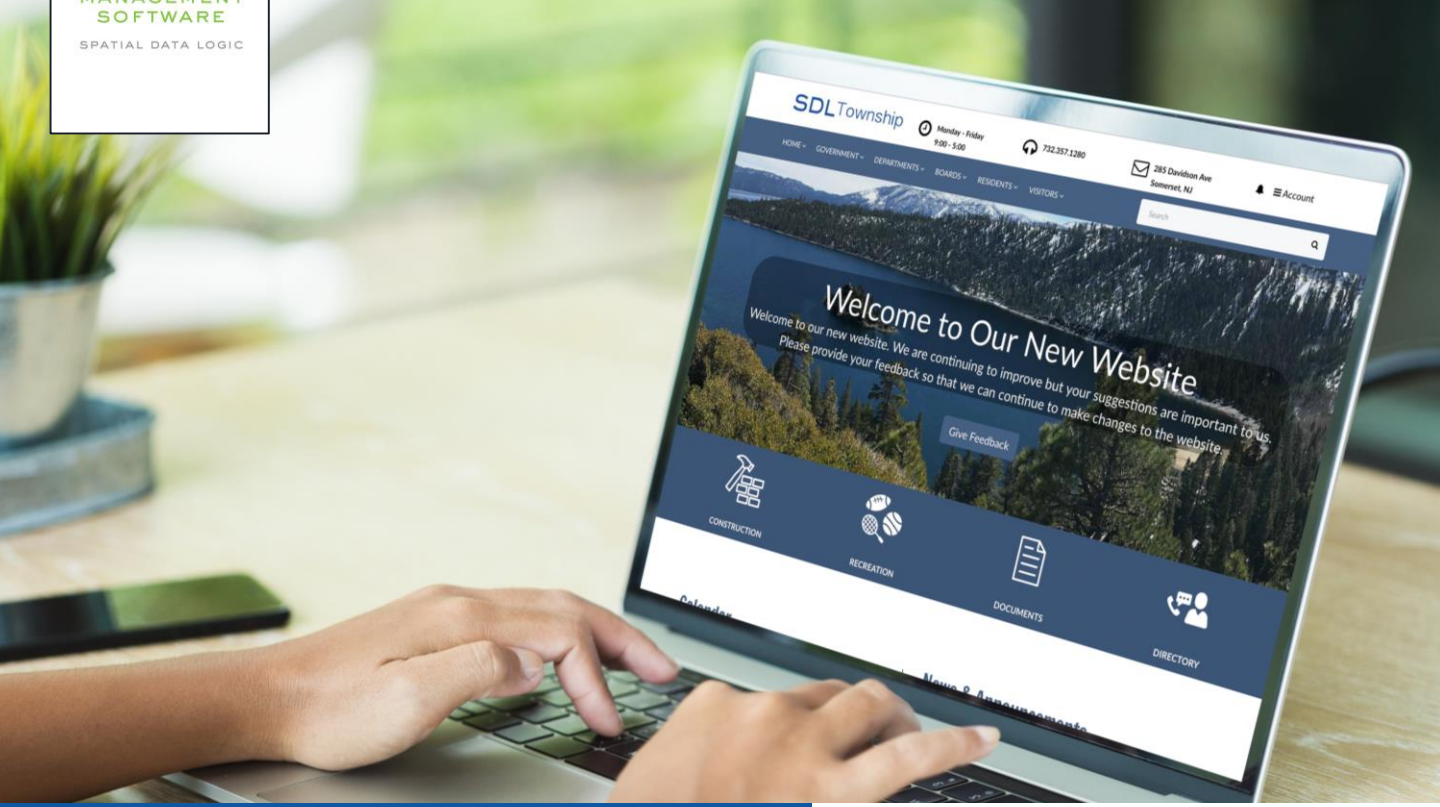

SDL SITES

Municipal websites are traditionally a one-way street where content is pushed to residents but they are unable to respond back or take action. SDL Sites provides a two-way street where residents can submit applications, search for information and see location-based content on their municipal website.

SDL Sites integrates with your other SDL Platforms to provide a seamless experience for your employees and residents.

UPGRADE YOUR MUNICIPAL WEBSITE

SITES IS INCLUDED
Website hosting, security and support is already included in your SDL Enterprise License. There is only a one-time setup fee to activate the website

IT'S READY
Your site is built and ready-to-go. All you need to do is select your pages and add content

EMPOWER RESIDENTS
Allow residents to search for information, share concerns, schedule inspections and submit applications online. The municipality has complete control over what residents can access

PERSONALIZATION
Residents will receive relevant status updates for their requests and alerts for upcoming renewals based on their account information and actions

USER FRIENDLY INTERFACE
Our content management system is intuitive, making it easy to add pages, alerts, documents and calendar invites from a computer, tablet or mobile device

INTEGRATION
Any actions taken on SDL Sites seamlessly integrate with the other SDL platforms
