

The Borough of Sandyston was looking for a new website provider to help improve its website for ADA accessibility and compliance.

By choosing GovSites Hosting & Support, the borough successfully launched a new website that offered a modern and user-friendly interface for citizens, in addition to ADA features.

Furthermore, GovSites' backend system made it easy for the municipality to set up and manage their own site moving forward.

"They helped with the build-out of the website and provided all the training, demos, and customer support to make the process smooth and seamless from beginning to launch. We cannot thank them enough for all their hard work, advice, help, and guidance through the whole process! We look forward to our continued working relationship."

- Amy Lobban, Sandyston Clerk
